Declaration of using Precautionary allergen labelling (PAL) for specific products.

We, **good system s.r.o.**, as the manufacturer of the following products:

Noordcode Organic Pure Plant Protein 450g
Noordcode Organic Power Cacao 300g

hereby declare that the use of Precautionary allergen labelling (PAL) is **not recommended and should not be used** for these products in accordance with the document “Richtlijnen kruisbesmetting allergenen, FNLI – CBL – NVWA – versie april 2024”.

Justification:

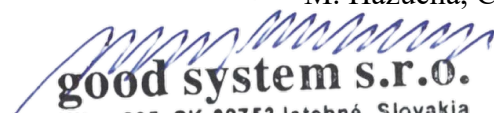

The products themselves do not contain any ingredients that cause allergies and all ingredients in the products listed are declared by the supplier or manufacturer as allergen-free or below the limit set by EU legislation for gluten (20 ppm) (“ingredients causing allergies” and “allergens” within the meaning of EU Regulation 1169/2011, Annex II).

The production process for all products in our facility is controlled to ensure that the final products do not contain allergens (according Regulation EU 1169/2011, Annex II), and possible concentrations of allergen proteins due to the risk of unintentional contamination in our facility in these products are lower than the absolute reference doses of allergen proteins ED05, which are published as a part of the document „Richtlijnen kruisbesmetting allergenen, FNLI – CBL – NVWA – versie april 2024“.

This declaration is issued in good faith and reflects the current state of production and raw material sourcing. The issuer reserves the right to limit the validity of this declaration in the event of changes in the manufacturing process or raw material sourcing, such information will be shared.
