Information about Sampling:

Sampler: customer
Sample information: **147-2026-00047856**
Sample description: Noordcode Complete Collagen Orange
Producer: NoordCode, Loopkantstraat 25, 5405 AC Uden, The Netherlands
Gross weight/volume: 450 g
Form of storing: tempered store 18°C ± 2 °C
Country of origin: Europe
Best before date: 12.03.2028
EAN-code: 8720648640346
Lot/Los-Nr.: 26SVy00033
Matrix: Food Supplements - Vitamin, mineral, combined supplements, and supplements with other nutritional or physiological effects

JUDGEMENT

Analyzed sample can be classified as composite and/or processed food according to article 20 of regulation(EC) 396/2005 (regulation on maximum residue levels in food and feed).

Where MRLs are not set out in Annexes II or III for processed and or composite food or feed, the MRLs applicable shall be those provided in Article 18(1) for the relevant product covered by annex I, taking into account changes in the levels of pesticide residues caused by processing and/or mixing.

In the sample no residues have been quantified.

Results of measurements comply with Commission Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC in its valid version.

Nevertheless, the standards laid down under article 19 of Regulation (EC) 396/2005 (The processing, and/or mixing for dilution purposes with the same or other products, of the products covered by Annex I not complying with Articles 18(1) or 20 with a view to placing them on the market as food or feed or feeding them to animals shall be prohibited.) have to be taken into account for each ingredient.

Results of measurements - lead, cadmium, mercury comply with requirements given in COMMISSION REGULATION (EU) 2023/915 of 25 April 2023 on maximum levels for

certain contaminants in food and repealing Regulation (EC) No 1881/2006.

The statement(s) of compliance / non-compliance with the specification (or requirements) is based on a 95% probability of coverage for the expanded measurement uncertainty of results on which decision rule is based according to ILAC-G8:09/2019 (applicable only to quantitative parameters).

The conformity / non-conformity assessment cannot be confused with the results of the conformity assessment carried out by the inspection or certification body.

Notes:

E - evaluation	ND - not detected by given method	TT - type of test
S - satisfied	LOQ, LQ – limit of quantification	A - accredited test executed at the own test laboratory
NS - not satisfied	CFU - Colony forming unit	N - non accredited test executed at the own test laboratory
ŠPP - Standard operation procedure	NM - necessary quantity	SA - accredited test executed under the subcontract
(A) - accredited sampling		SN - unaccredited test executed under the subcontract
(SA) - accredited sampling executed under the subcontract		(TM) - testing outside the laboratory at the customer
m - the highest allowed value at the case of one sample		
M, c - "M" highest allowed value for the number "c" at the case of 5 sample's evaluation		
* - measurement uncertainty – sampling and analysis – determined by extension coefficient k=2 (with probability of 95%). If sample is taken by the customer uncertainty of sampling is not available.		
- uncertainty given in % reflects the uncertainty from the result of measurement.		
** - Acceptable to consumers and no abnormal change		
SL - analysis laboratory: NZ-Nové Zámky		

Disclaimer: Laboratory is a disclaimer when the information is supplied by the customer (#) and can affect the validity of results. If the sample has been provided by the customer, the results refer to the sample as it was received. Gauges and measuring equipment used for testing were calibrated or attested in accordance with the valid metrological instructions. The above mentioned test results refer to the tested sample only! The result given in this Analytical report and marked as non accredited test shall not be a subject of accreditation. The result given in this Analytical report and marked as sub- delivery is the result of a Subcontractors gauging made under the terms and conditions of a contract concluded with him.
