

Raw, CO₂-extracted Hempanol™

Supports a healthy whole body response*

100% raw CO₂-extracted organic hemp oil with raw, wild CO₂-extracted P73 oregano oil
Top source of CB2 receptor activator beta caryophyllene

Hempanol is the highest grade whole food, organic hemp extract available. This is the CO₂ extract of hemp, which means it is 100% raw. The CO₂ extract captures all the key ingredients, including the full spectrum of cannabinoids and the all-important, super-potent terpene beta caryophyllene.

It is beta caryophyllene which is nature's most potent activator of key cellular receptors known as CB2 receptors. The CB2 receptors are essential for activating a wide range of body functions. Their actions are critical for overall wellness and optimal health. The receptors are located strategically in key organ systems, including the brain, spinal cord, thyroid gland, adrenal glands, ovaries, testes, heart, spleen, intestines, and lymphatic cells. Upon activation, the receptors aid the body in a vast number of ways, modulating inflammation, boosting immune function, enhancing circulation, stimulating digestion, and improving neurological function. Support your health in every way possible through this potent formula. Feel the benefits of Hempanol to activate body functions where they are needed the most.

A true whole food substance, beta caryophyllene is the most potent natural CB2 receptor activator known. It is found in rich amounts in the two ingredients of this formula, CO₂ hemp and CO₂ wild oregano. The wild oregano P73 helps activate and synergize the hemp, which is the richest food source of beta caryophyllene

known. Both wild oregano and hemp contain unique forms of caryophyllene molecules. Other key ingredients are the cannabinoids, wild carvacrol, wild thymol, and wild aromatic esters. It's P73-fortified. That's what makes Hempanol unique. Hempanol is a CBD-rich, crude, whole food, raw, unaltered form of hemp oil, with the full cannabinoid complex.

So take Hempanol as a daily supplement; use it to support the body's needs. It's natural, organic, wild, and raw. What could be more powerful than that?

Directions: Take 5 or more drops under the tongue or in juice/water once or twice daily.

Gertsch, J. 2008. Beta caryophyllene is a dietary cannabinoid Proc Natl Acad Sci. 105: 9099
