Remarks:

- The results mentioned above are only related to the sample as received by the laboratory.
- PRIMORIS cannot be held responsible for the validity of the results in case that information is provided by the client which can affect the validity of these results.
- Reporting Limits of all compounds per method are available in the client-section of www.primoris-lab.com
- PRIMORIS can not be held responsible for any errors in the legal regulation mentioned in this report. These are made available solely for the purpose of information and refer to the products as specified in the applicable legislation. No MRLs are stated for animal products (with the exception of milk, honey and eggs).
- (a): tolerance not assignable, see relevant legislation.
- (c): sample type - pesticide combination not allowed, see corresponding legislation
- (d): no MRL required
- This certificate of analysis may not be reproduced, except in entire form with a written permission of the management.
- This certificate was produced electronically and is valid without manual signature. Name and function of the responsible of this document was provided on the basis of a secure and personalized login procedure. Additional manually signed copies of this document can be produced on individual demand.
- Feed results are not corrected to a 12% moisture content
- When trace values are reported (until 1/3th of the original reporting limit), the result value is semi-quantitative and non-accredited.
- Full scope of methods available on the Primoris client portal and/or another report lay-out
- U: the expanded measurement uncertainty U (by multiplying the measurement uncertainty with factor 2 what produces a 95% reliability interval) is expressed as % of the analysis result x. Result to be read as x + - U.
- The expanded measurement uncertainty MU is mentioned next to each found compound.
- For pesticides, in case of (b), the default expanded measurement uncertainty is 50% as mentioned in the SANTE 11312/2021 v2 document
- For pesticides the process factor (concentration factor) of dried, concentrated or processed products, should be used to recalculate the analytical result before comparing it with the legal limits (that are valid on unprocessed products).
- Primoris Holding is accredited by Belac under the certificate nr 057-TEST
- This certificate is generated under the authority of Primoris Holding, Technologiepark 90, B-9052 Zwijnaarde - Gent, Belgium.
- Accredited methods (indicated on the report) are reported under the accreditation of Primoris Holding (BELAC 057-TEST/ISO17025).
- A: compound under accreditation
