Hi Blanka,

I have conferred with our Quality Manager, who confirms that PAH is monitored for every batch of oil and consistently complies with the European regulation regarding PAHs:

- Benzo(a)pyrene $\leq 2.0 \mu\text{g/kg}$
- Sum of Benzo(a)pyrene, Benz(a)anthracene, Benzo(b)fluoranthene, and Chrysene $\leq 10 \mu\text{g/kg}$

The statement you have remains valid.

Please let us know if you would like a similar statement with an updated signature date. However, we do not have a practice of issuing batch-specific PAH statements.

Med venlig hilsen/ Best regards

Hi Justyna,

I have been checking our files and also found a statement about PAH. Could we please have one for the batch 30024953? I have attached our previous statement for your reference.

Thank you.
